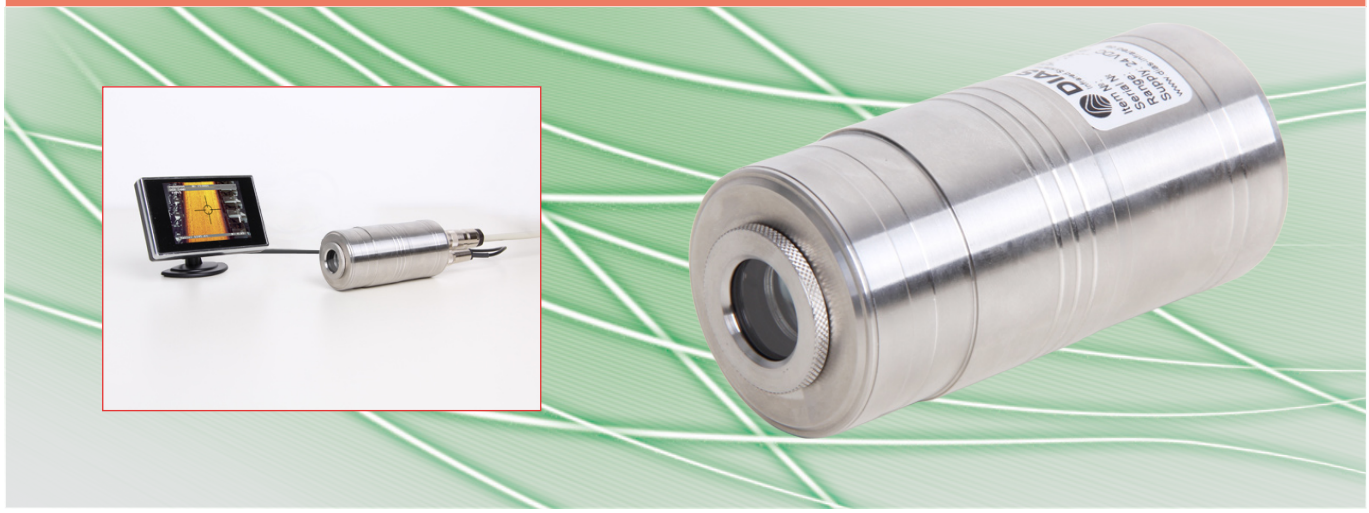
PYROSPOT DSR 54N/DSR 54NV

Ratio pyrometer for industrial application

DIAS Infrared Systems

Overview

Digital ratio pyrometer with RS-485 interface



Special features

- For temperature measurements between 500 °C and 3000 °C
- Temperature linear output 0/4 to 20mA
- Integrated RS-485 interface
- Integrated laser aiming light or video camera
- Robust stainless steel housing
- Very short response times from 5 ms

Description and application

The digital ratio pyrometer PYROSPOT DSR 54N is specifically designed for industrial purposes. This devices are suitable for non-contact temperature measurement from 500 °C on different surfaces like metal, graphite or ceramics. It measures the infrared radiation in two adjacent wavelengths and determines therefrom the temperature value.

The solid and compact stainless steel housing allows usage even under rough environmental conditions. Measuring spot sizes from 3.5 mm for the PYROSPOT DSR 54N can be easily realized. With a minimal response time of only 5 ms (t95) the devices are usable for fast measuring tasks.

The temperature linear standard output signal of 0/4 to 20 mA allows an easy implementation in existing measurement and control systems.

Use the optional integrated red laser aiming light for the exact aiming of the pyrometer to the measurement object .The optional integrated video camera module (DSR 54NV) provides an anti-glare aiming of the pyrometer even when the measurement object is very hot. It substantially facilitates the adjustment under difficult local conditions where the pyrometer is not easy to reach or the measurement object cannot be seen directly.

The PYROSPOT DSR 54N possesses a RS-485 interface. The devices are bus-compatible in this way and use the Modbus RTU protocol.

You can connect the pyrometer via an optionally available interface adaptor RS-485 to USB with a PC. Connect the pyrometer to a PC to adjust the parameters ratio correction, emissivity, sub temperature range, data storage settings and response time to the application by using the comfortable parameterizing and evaluation software PYROSOFT Spot.

Typical application areas:

- Steel and metal industry
- Furnace industry
- Hardening
- Welding
